

- 1.
2. You've courted my girls for me. You helped me find my wife. At the sight of you my domestic troubles fade away and a scowl is replaced by a "sweet" smile.
CANDY -- what a wondrous friend you are.
3. Last night my wife said she knew just how you were made. Here are some of the things she didn't know. The cocoa bean is first baked and then ground.
4. Fifty pounds of chocolate -- 50 pounds of sugar and 1 pound of Mexican Vinalla Beans are used in making a batch of paste for coating.
5. Grinding out all roughness in the paste and working it into coating.
6. Even a chocolate must have a fancy shape.
7. Filling molds. Food value of chocolate is 2860 calories per pound.
8. A tired dice player invented this machine which is now used to shake the chocolate loose from the molds.
9. Preparing the filling or fondant, which is made of sugar boiled to a syrup. 400,000 tons of sugar were used in 1919 in candy making in U. S.
10. Mixing in cream beater. Here the different flavors of cream are added.
11. Filling molds with cream. 150 boards are filled per hour, making 450 pounds of cream centers.
12. Machine dipped chocolates.
13. The final coat after which they are stroked by hand.
14. Hand dipping. 8% of sugar used in U. S. goes into manufacturing candy.
15. Here my wife showed some knowledge, having emptied many a box. The nation's candy bill of \$1,250,000,000 yearly is exaggerated.
16. All the nuts are not of this country. Here are some from Brazil which are being dipped in bob bon cream.
17. Cutting nougats into proper size.
18. Coating almonds. The candy industry employs about 80,000 in this country.
19. Mixing color with hard candy. The use of harmful coloring is unlawful.
20. Shaping and cutting hard candies.
21. Here again my wife showed some knowledge.
22. Fancy, a fancy candy basket -----
23. ----- all made by hand 'n everything. In this country the output of candy per year amounts to one billion pounds.
24. Really the only thing my wife knows about candy is how to eat it. Candy has a substantial food value.

(The End)
